*Gross Beta includes K-40 occurring naturally in seawater.

**Under the Comprehensive Radiation Monitoring Plan, it is planned to conduct sampling at T-2-1. However, sampling at T-2-1 was replaced by sampling at T-2 on/after 13 September 2016, because the road access to T-2-1 had been damaged by typhoon. Furthermore, T-2 was moved from 330m to 280m south of the outlet for Reactor Units 1 to 4, on 27 January 2017 and sampling has been conducted at the new location since that day.
