The NRA received a report from Chubu Electric Power Co., Inc. regarding the measures to improve seismic safety of Unit 2 reactor at Hamaoka Nuclear Power Station.

This is to announce to the public that the NRA received a report from Chubu Electric Power Co., Inc. regarding the measures to improve seismic safety of Unit 2 reactor at Hamaoka Nuclear Power Station.

Course of Events

NISA directed Chubu Electric Power Co., Inc. (hereinafter referred to as Chubu) on August 3, 2012, to implement measures for improvement of seismic safety in Unit 2 reactor at Hamaoka Nuclear Power Station. NISA also directed Chubu to formulate the principle of the measures and submit an implementation plan by August 17, 2012 (Already announced on August 3, 2012).

Responding to the above direction, Chubu submitted NISA a report on the principle of the measures and an implementation plan on August 17, 2012, for improvement of seismic safety of Unit 2 reactor at Hamaoka Nuclear Power Station. Also, Chubu stated it would report the result of the plan by the end of October, this year (Already announced on August 17, 2012).

Today, the NRA received a report from Chubu on the measures for improving seismic safety of Unit 2 reactor at Hamaoka Nuclear Power Station (Refer to the attached document).
